EDUCATION

- Government College of Engineering and Ceramic Technology
- Kolkata, India
- Bachelor of Technology - Computer Science & Engineering; CGPA: 9.78
- 2020-2024

SKILLS SUMMARY

- Languages: JavaScript, TypeScript, Python, HTML5, CSS3, SQL, Java, Dart
- Frameworks/Libraries: React.js, Node.js, Express.js, Angular, Django, Flutter
- Databases: MongoDB, PostgreSQL, MySQL, Microsoft SQL Server
- Tools/Platforms: Docker, Git, GitHub, Postman, RabbitMQ, CI/CD, VS Code, Vercel, MongoDB Atlas, Figma

EXPERIENCE

- SISL Infotech Pvt Ltd
- Kolkata, India
- Software Engineer
- Aug 2024 - Present
- Engineered **scalable RESTful APIs** using **Node.js**, **Express.js**, and **PostgreSQL**, handling 10,000+ daily requests with 99.9% uptime.
 - Designed **modular architecture** for government-led systems, reducing maintenance overhead by 25% using **Angular** and **Express.js**.
 - Implemented **RabbitMQ**-powered asynchronous workflows, cutting inter-departmental data sync latency by 40%.
 - Optimized **PostgreSQL** read-heavy operations with master-slave strategies, improving query performance by 30%.
 - Contributed to **CI/CD pipelines** with **Docker**, reducing deployment cycles by 30% for production releases.
 - Collaborated with distributed teams to deliver **secure microservices** with encryption and audit logging.
- ARC Document Solutions
- Kolkata, India
- SDE Intern
- Dec 2023 - May 2024
- Designed **efficient MongoDB schemas** for B2B document systems, improving data retrieval speed by 35%.
 - Developed **RESTful APIs** with **Node.js** and **Express.js**, supporting high-volume analytics for 1,000+ enterprise users.
 - Refactored stored procedures in **PostgreSQL**, reducing compute costs by 30% and boosting throughput.
 - Integrated scalable APIs with production systems, ensuring 99% uptime for reporting pipelines.
- Basel Practitioners Private Limited
- Remote
- SDE Intern
- Nov 2022 - Mar 2023
- Built a **mobile app** for agricultural data collection, enabling 500+ farmers to track field data with 99% accuracy.
 - Developed **RESTful APIs** using **Node.js**, **Express.js**, and **MongoDB**, supporting real-time geolocation and route tracking.
 - Optimized **MongoDB** queries with indexing, improving performance by 2x for spatial data workflows.
 - Integrated **geolocation widgets** with **React.js**, achieving seamless offline data sync for remote users.

PROJECTS

- CreditFlowPulse**: Developed a full-stack FinTech platform to track and forecast cash flow for MSMEs using **React.js**, **Node.js**, **Express.js**, and **PostgreSQL**. Implemented secure authentication, income/expense management, and visual dashboards with real-time data binding and charting. Deployed frontend on **Vercel**, backend on **Render**
[Deployed Link](#)
- Fitness App**: Built a responsive fitness application using **React.js (Hooks)** and **RapidAPI**, enabling users to browse 1,000+ categorized exercises with integrated YouTube video previews. Implemented responsive pagination and optimized **RESTful API** consumption for smooth performance across devices.
[Deployed Link](#)
- BlogSphere**: Developed a full-stack blogging platform using **React.js**, **Node.js**, **Express.js**, and **MongoDB**. Implemented real-time CRUD functionality, integrated secure **Firestore authentication**, and designed a fully **responsive UI** with **CSS3**. Deployed on **Vercel** with production-ready **RESTful APIs**.
[Deployed Link](#)
- DeepLearnRNA**: Developed an AI-powered method integrating **BERT**, **XLNet**, and **GPT-2** for **RNA** and **protein structure analysis**, designed for seamless integration into API-driven bioinformatics applications. Achieved a 15% improvement in **RNA family prediction** accuracy through advanced deep learning ensemble modeling.
